PROFESSIONAL SUMMARY

Detail-oriented Full Stack Web Developer and B.Tech Information Technology student specializing in the MERN stack and TypeScript. Adept at building highly scalable, statically-typed web applications and RESTful APIs using React.js and Node.js. Combines a strong foundation in complex data structures and algorithmic complexity with hands-on product marketing experience. Passionate about creating performant frontend architectures and AI-integrated solutions for real-world problems.

EDUCATION

Oriental Institute of Science and Technology

Expected Graduation: 2028

Bachelor of Technology (B.Tech) – Information Technology

Affiliated to Rajiv Gandhi Proudhyogiki Vishwavidyalaya

TECHNICAL SKILLS

- **Programming Languages:** TypeScript, JavaScript, C++, Python, Java
- **Frontend Development:** React.js, Tailwind CSS, HTML5, CSS3, Component-Based Architecture
- **Backend & Databases:** Node.js, Express.js, MongoDB, REST APIs, Socket.IO
- **Tools & Cloud Platforms:** Git/GitHub, Postman, Firebase, Salesforce Ecosystem (Agentforce, Einstein Trust Layer)
- **Core Competencies:** Data Structures (Stacks, Queues, Binary Search Trees), Object-Oriented Programming (OOP), Algorithmic Complexity Analysis, Technical Multimedia Production

INTERNSHIP EXPERIENCE

Cybrom Technology Pvt Ltd

MERN Stack Intern

- Developed responsive frontend interfaces utilizing React.js and reusable UI components, improving maintainability for scalable web applications.
- Integrated RESTful backend APIs using Node.js and Express.js, executing efficient CRUD operations within a MongoDB database.
- Collaborated in a modern agile workflow utilizing Git and GitHub for version control, streamlining code reviews and deployment processes.

TECHNICAL PROJECTS

KRISHI MITRA — AI-Powered Agriculture Platform

Technologies: TypeScript, React.js, Node.js, Express, Tailwind CSS

- Engineered a scalable, digitally accessible agriculture platform focused on providing actionable insights regarding soil health and pH detection for farmers in rural India.
- Developed a strongly-typed frontend architecture utilizing TypeScript and React to ensure a seamless and bug-free user experience across mobile and desktop devices.
- Led comprehensive product marketing initiatives, including scripting and directing a 90–120 second ultra-realistic cinematic advertisement video to drive platform engagement and adoption.

KARISHMA'S KITCHEN — Modern Restaurant Application

Technologies: TypeScript, React.js, HTML5, CSS3

- Built a highly responsive, modern restaurant interface utilizing React.js to dynamically render food showcase sections and interactive menus.
- Implemented strict UI/UX development principles and accessibility-focused design, optimizing cross-device navigation and reducing visual layout shifts.

[!\[\]\(0f848bbd71cef6b345273b16f905912a_img.jpg\) GitHub Repository](#) | [!\[\]\(d873c0073cfd3b74a7c9b5ca09bad0c7_img.jpg\) Live Demo](#)

TAGORE VIDYA NIKETAN — Educational Management Interface

Technologies: TypeScript, React.js, Tailwind CSS

- Architected a component-based educational institution portal focused on streamlined student navigation and organized content presentation.
- Utilized frontend frameworks to ensure rapid load times and complete responsiveness across varying screen sizes.

[!\[\]\(3211b5d1d968fc1665909b34f9f16010_img.jpg\) GitHub Repository](#) | [!\[\]\(d47ad152ec3d86a04ad64c8049e1f17f_img.jpg\) Live Demo](#)

REDLIFELINE HUB FOUNDATION — NGO Web Platform

Technologies: TypeScript, React.js, JavaScript

- Developed a digital presence for a social organization, creating visually organized data management sections to highlight foundation activities.
- Enforced clean frontend architecture principles to maintain code consistency and ease of future updates.

LEADERSHIP, ACHIEVEMENTS & ACTIVITIES

- **Campus Technical Leadership:** Directed and coordinated major campus technical and cultural events, successfully managing logistics, digital poster generation, and marketing for events including the Skit Competition (April 2026), TechHack 2.0 featuring live performances (April 2026), and the Techfizz x Pharmazephyr collaboration.
- **Advanced Problem Solving:** Actively design and optimize complex algorithms using C++ and Python on LeetCode, focusing on reducing time and space complexity in core data structure implementations.
